VOLUME 29 NO. 1–3 SPECIAL ISSUE

GEOCHEMICAL EXPLORATION 1985, Part II

Proceedings of the 11th International Geochemical Exploration Symposium held at the Metro Toronto Convention Centre, Toronto, Canada, from April 28 to May 2, 1985

Edited by

R.G. GARRETT

Geological Survey of Canada, 601 Booth St., Ottawa, Ont. K1A 0E8, Canada)

CONTENTS

Author index ix

Environmental geochemical studies

Re-examination of Hg pollution in the Ashtabula area, Ashtabula County, Ohio
R.A. Anderson and E.H. Carlson (Kent, Ohio, U.S.A.) 1

The application of regional geochemical reconnaissance data for uranium in surface water to identifying environmentally sensitive areas
P.J. Doyle (Regina, Sask., Canada) and R.D. Morse (Vancouver, B.C., Canada) 13

A study of the heavy-metal pollution in the bottom sediments at Porto di Bagnoli (Naples), Italy
W.E. Sharp (Columbia, S.C., U.S.A.) and G. Nardi (Naples, Italy) 31

Biogeochemistry: A geochemical method for gold exploration in the Canadian Shield
D.R. Cohen (Kensington, N.S.W., Australia), E.L. Hoffman (Hamilton, Ont., Canada) and I. Nichol (Kingston, Ont., Canada) 49

Temporal variation of metal concentrations in biogeochemical samples over the Royal Tiger Mine, Colorado, Part I: Within year variation
J.D. Stednick, R.B. Klem (Fort Collins, Colo., U.S.A.) and W.C. Riese (Houston, Tex., U.S.A.) 75

Case histories and regional studies

Visualization of geochemical data on maps: New options
A. Björklund and N. Gustavsson (Espoo, Finland) 89

The Strange Lake Zr-Y-Nb-Be-REE deposit, Labrador: A geochemical profile in till, lake and stream sediment, and water
J.W. McConnell and M.J. Batterson (St. John's, Nfld., Canada) 105

Regional geochemical studies in parts of Maine, New Hampshire and Vermont, U.S.A.
G.A. Nowlan, F.C. Canney, F.H. Howd and J.A. Domenico (Denver, Colo., U.S.A.) 129

Tungsten exploration in the Valnesfjord region, Nordland, northern Norway
L.R. Petersen and H. Stendal (Copenhagen, Denmark) 151

Evaluation of geochemical methods in exploration for primary tin deposits: Batu Gajah-Tanjong Tualang area, Perak, Malaysia
T. Sirinawin, W.K. Fletcher and P.E. Dousset (Ipoh, Malaysia) 165

Geochemical mapping and prospecting in Greenland — A review of results and experience
A. Steenfelt (Copenhagen, Denmark) 183

Analytical chemical studies

Mineralogical basis for the interpretation of multi-element (ICP-AES), oxalic acid, and aqua regia partial digestions of stream sediments for reconnaissance exploration geochemistry
S.E. Church, E.L. Mosier and J.M. Motooka (Denver, Colo., U.S.A.) 207

Analysis of ancient sediments for total organic carbon — Some new ideas
P.L. Churcher and R.D. Dickhout (Waterloo, Ont., Canada) 235

Experiments on the use of selective extraction for anomaly classification
S. Dijkstra, H.J. van den Hul (Delft, The Netherlands), Y.M. Jubeli (Damascus, Syria), M.V. Ramanamurthy (Bangalore, India) and T.K. Sen (Baidyabati, India) 247

Interpretive studies

Catchment basin analysis applied to surficial geochemical data, Cobequid Highlands, Nova Scotia
G.F. Bonham-Carter (Ottawa, Ont.,Canada), P.J. Rogers (Halifax, N.S., Canada) and D.J. Ellwood (Ottawa, Ont., Canada) 259

Multivariate geochemical modelling and integration with petrophysical data
L. Lindqvist, I. Lundholm, D. Nisca (Luleå, Sweden), K. Esbensen (Oslo, Norway) and S. Wold (Umeå, Sweden) 279

Improving anomaly selection by statistical estimation of background variations in regional geochemical prospecting
C. Roquin (Strasbourg, France) and H. Zeegers (Orléans, France) 295

The geochemistry of residual soils as an aid to geological mapping: A statistical approach
A. Shepherd, P.K. Harvey and R.C. Leake (Nottingham, Great Britain) 317

Anomaly recognition for multi-element geochemical data — A background characterization approach
C.R. Stanley and A.J. Sinclair (Vancouver, B.C., canada) 333

Workshop reports

Workshop 1: Biogeochemistry
C.E. Dunn (Ottawa, Ont., Canada) 355

Workshop 2: Till geochemistry
C.F. Gleeson (Jroquois, Ont., Canada) and I. Nichol (Kingston, Ont., Canada) 359

Workshop 5: Geochemical anomaly recognition
J.W. Aucott (Nottingham, Great Britain) 375

Presidential address

The role of the Association in today's exploration world
R.G. Garrett (Ottawa, Ont., Canada) 377

Abstracts

Spatial representation of geochemical data: Examples from the overseas programme directorate, British Geological Survey
J.D. Appleton, R.C. Jones and J. Ridgway (Nottingham, Great Britain) 381

Application of image analysis techniques in mineral exploration using regional geochemical data
S. Aronoff and W.D. Goodfellow (Ottawa, Ont., Canada) 382

Regional geochemical mapping in northern Finland, Norway and Sweden
J. Bergstrom (Luleå, Sweden), A. Björklund (Espoo, Finland), B. Bolviken (Trondheim, Norway), M. Konti, P. Lehmuspelto (Espoo, Finland), T. Lindholm, J. Magnusson (Luleå, Sweden), R.T. Ottesen (Trondheim, Norway), A. Steenfelt (Copenhagen, Denmark) and T. Volden (Trondheim, Norway) 383

Pb-Zn-Ag dispersion in stream sediments in contrasting geological environments in the Yukon
L.B. Bloom (Toronto, Ont., Canada) 384
Development of ammonium geochemistry as a new technique in precious and base metals exploration
E. Bloomstein (Salt Lake City, Utah, U.S.A.), R.A. Kydd and A.A. Levinson (Calgary, Alta., Canada) 386
The Geochemical Atlas of Alaska
S.L. Bolivar, D.E. Broxton, S.H. Freeman and T.A. Weaver (Los Alamos, N.M., U.S.A.) . 387
The Rea Gold massive sulfide deposits, Adams Lake, B.C.: A geochemical exploration study
A.J. Davidson and I.D. Pirie (Delta, B.C., Canada) 390
Biogeochemical prospecting using lead isotopes
J.A. Dean and B.L. Gulson (North Ryde, N.S.W., Australia) 391
Enhancement of stream-sediment anomalies distal to Cu-Au porphyry systems in Papua New Guinea: Orientation survey
P.E. Drez (Houston, Tex., U.S.A.) 393
Lithogeochemical exploration for stratabound arsenopyrite-gold mineralization in the southern Uplands, Scotland
P.R. Duller (Glasgow, Great Britain) and P.K. Harvey (Nottingham, Great Britain) 395
Application of an inductively coupled plasma mass spectrometer to the determination of lead isotope concentrations and related trace-element abundances in minerals, waters and soils associated with some base metal and gold occurrences in Ontario: A preliminary report
T.E. Eagles, E.J. Brooker and R.G. Smith (Don Mills, Ont., Canada) 396
Geochemical mapping of Sweden
J. Ek (Uppsala, Sweden) 397
Rock, basal till and vegetation geochemical signatures of the Agassiz stratabound Au-Ag deposit, Lynn Lake, Manitoba
M.A.F. Fedikow and E. Nielsen (Winnipeg, Man., Canada) 399
Preliminary results of multidisciplinary studies around the recently discovered Allan Lake carbonatite, Algonquin Park, Ontario
K.L. Ford, R.N.W. Dilabio and A.N. Rencz (Ottawa, Ont., Canada) 401
Sulfur, uranium and trace elements in Swedish mires planned for fuel-peat production
J. Fredriksson (Uppsala, Sweden) 403
Stream sediment geochemical anomalies for uranium on granite plutons with high and low zirconium contents
C. Frick (Pretoria, South Africa) 405
Multifractional analyses in geochemical exploration for tin mineralization
D.R. Gladwell (Rexdale, Ont., Canada) and M. Hale (London, Great Britain) 407
Geochemical exploration for tin using suspended sediment sample media
D.R. Gladwell and R.E. Lett (Rexdale, Ont., Canada) 409
The Beaver-Temiskaming silver sulpharsenide vein deposits, Cobalt: Vein and host rock geochemistry with applications to exploration
M.D. Goodz (Parkville, Vic., Australia), I.R. Jonasson, D.H. Watkinson and D.M. Kingston (Ottawa, Ont., Canada) 411
Automated XRF spectrometric analysis: A rapid, cost-effective analytical technique for the mineral industry
P.K. Harvey and B.P. Atkin (Nottingham, Great Britain) 413
Fluid inclusion chemistry in the exploration for Mississippi Valley-type deposits: An example from East Tennessee
F.M. Haynes and S.E. Kesler (Ann Arbor, Mich., U.S.A.) 416

The application of low-cost multielement data by neutron activation analysis suitable for exploration geochemical techniques
E.L. Hoffman and A. Pidruczny (Hamilton, Ont., Canada) 417
An alternate approach to sampling problems in exploration for gold
M. Ikradmuddin (Cheney, Wash., U.S.A.) 419
Relationship between glacial history and drift composition
R.A. Klassen (Ottawa, Ont., Canada) 421
Computer data-processing: A help or hindrance?
O.P. Lavin and I. Nichol (Kingston, Ont., Canada) 423
Geochemical studies on gold in till in Nova Scotia
I.J. Maceachern and R.R. Stea (Halifax, N.S., Canada) 425
Geobotany and biogeochemistry in mineral exploration in the tropics
E.A.V. Prasad (Tirupati, India) 427
MAX, a program system for multivariate data analysis of geochemical exploration data
S. Rehder and A. Muller (Hannover, F.R. Germany) 429
Geobotanical remote sensing: An overview
B.N. Rock (Pasadena, Calif., U.S.A.) 430
The use of peatlands in geochemical exploration
W. Shotyk (London, Ont., Canada) 431
Exploration for Mississippi-Valley type stratabound Zn-Pb ores with stream suspensates and associated sediments
F.R. Siegel (Washington, D.C., U.S.A.) 432
Relationship of fluid inclusion geochemistry to wall-rock alteration and lithogeochemical zonation at the Hollinger-McIntyre gold deposit, Porcupine District, Canada
E.J. Smith (Deadwood, S.D., U.S.A.), S.E. Kesler (Ann Arbor, Mich., U.S.A.) and E.H.P. van Hees (Timmins, Ont., Canada) 434
Gold exploration in deep glaciated overburden: Experiences from the Belore case history
I. Thomson (Vancouver, B.C., Canada), J.G. Burns and F.H. Faulkner (Toronto, Ont., Canada) 435
Exploration for gold in the humid tropics
J.S. Tooms (New York, N.Y., U.S.A.) 437
Comparison of geochemical maps generated by laboratories using different analytical methods
X. Xie, J.P. Wang and B.G. Zhu (Langfang, Hebei, People's Republic of China) 440
